

# ACCULARM SECURITY SYSTEMS

QUARTERLY NEWSLETTER ~ APRIL 2017

## North State Strong!

All of us here at Accularm would like to thank our North state community for coming together and helping one another out during our recent Oroville Dam Evacuation situation. It was a stressful and scary experience to go through, but we all pulled together and showed exactly what our community is made of. We would also like to thank Sheriff Honea in particular for his steady hand and calm demeanor throughout, as well as the many customers who called to check on us and the gratitude that they expressed for the fact that we were on the job for them despite the unfolding crisis. Thank you!

.....

We are now able to offer email notification of alarm activity as an added layer of connectivity to your alarm system. For a small monthly fee, you can receive real time, detailed email notifications of the activity of your alarm systems Burglary, Fire, Power status & Arm/Disarm activity.

---

## Remote Management

Most newer alarm systems can now be remotely managed over the internet through laptops & smartphone Apps. You can arm and disarm your system remotely, perform automation tasks, and look in on your security cameras with ease. Ask us how you can add remote management services to your alarm system!

---

Ask us about adding Smoke, Heat and/or Carbon Monoxide detectors to your home or business. These important pieces of equipment can protect our lives and livelihoods, keeping diligent watch on our safety 24/7.

.....

Cellular communication is available if you lose your landline or switch to a VOIP phone service. Cellular communication is the new gold standard for reliability, convenience and longevity. Ask us how you can switch!

---

## Reminders

We would like to remind everyone about one of Accularm's signature features, our exterior alarm status light. This is a small red light, typically mounted on the front of a home or business, which indicates it's status. On solid means it is armed and undisturbed, flashing means the system has been tripped and caution should be applied upon entering.

.....

Save \$\$ on your monitoring fees by taking advantage of our referral program. For each new customer that you refer who signs a contract with us, you will get 2 months of free monitoring! There is no limit, refer 6 new customers and your year of monitoring is free!
